### About

I am a digital product designer specializing in rapid solution development through creative thinking and emerging technologies. My work focuses on identifying meaningful design value and real user needs through user-centered, collaborative processes. Using fast-paced prototyping with HTML, CSS, and JavaScript, I test usability, gather feedback, and refine designs with a strong emphasis on interaction quality and accessibility. At a macro level, my process aligns stakeholders around clear user goals and the purpose behind each design solution.

### Experiences

#### Swave Studios

<https://www.swavestudios.com/>

Junior Industrial Designer (Internship)  
2025 October - 2025 November

Explored diverse design solutions and translated design methodologies into practical applications. Participated in stakeholder meetings and cross-functional collaboration, building expertise in project development workflows, design strategy positioning, and professional documentation practice

#### Cadillac Fairview

<https://www.cadillacfairview.com/>

Student Designer (Co-op)  
2024 October - 2024 December

Collaborated directly with clients from Cadillac Fairview and stakeholders in a team-based environment to conduct UX research and develop design solutions for physical space interactions. Engaged in continuous stakeholder communication throughout the project lifecycle while working cross-functionally to explore new perspectives on environmental interactions and elevate consumer experience.

#### OCAD University – Copy & Printing

<https://www.ocadu.ca/student-services/copy-and-print>

Student Monitor (Production)  
2023 September – 2024 April

For my first paid job in Canada, I worked as a Student Monitor at OCAD University, managing printing-related tasks and production workflows. This experience introduced me to Canadian workplace culture, collaborative problem-solving approaches, and cross-cultural communication in a professional English-speaking environment

#### Ieumgil (HR Consulting Firm)

<https://ieumgil.com/Main>

Graphic Designer/Proposal Designer (Part-time)  
2022 November – 2023 March

Worked as a Proposal Designer for a company specializing in government projects, I gained hands-on experience in proposal design and high-volume service design environments. This role deepened my understanding of practical design requirements in professional settings and taught me to strategically apply formal visual design language to meet real-world business needs

#### Military Service – Army, Military Police

[www.mnd.go.kr](http://www.mnd.go.kr)

Sergeant (SGT), Squad Leader  
2021 May – 2022 November

Completed 18-month mandatory military service as a Military Police officer, progressing to squad leader. Developed resilience in high-pressure situations, team leadership capabilities, and administrative skills. This experience strengthened my adaptability and ability to perform effectively across diverse work environments.

### Expertise
